ANATP/BNATP Monthly Update September 2021-Supplemental

Governor Pritzker has mandated the CMS COVID-19 Training for Frontline Staff for all CNA and nursing students. It is a five-hour module available online at the link below. It is not timed. I was able to complete it in 35 minutes. As this is mostly basic infection control with additional material related to COVID-19, you can use this five-hour module as part of your required training in infection control. If you wish to add this in addition to your regular infection control training, please submit a new Allocation of Hours.

Students must take this module and pass. The certificate of completion must be part of the students' records. Your clinical partners will likely request verification of this training therefore it would be good practice to keep copies of those certificates with the clinical instructors at all time.
